37 john stays in hospital

A Look at the picture and read the story.

Last December it was very cold and it snowed a lot. One Saturday, John was playing with his sledge on the hill near his house with a group of friends. Suddenly, he fell and broke his leg. His friends ran to tell his mother. An ambulance came and took John to hospital.

John had to stay in hospital. The nurses and the other children in the hospital were very friendly and at first he was happy because he didn't have to go to school. He laughed at all of his friends. They had to do a lot of homework and exams. He enjoyed listening to music and watching his favourite television programmes all day.

But then the Christmas holidays started. John was still in hospital. He was tired of watching television and of hearing his CDs and he wanted to go home. 'This is horrible,' he thought. He felt sad so he started to cry.

But then a man came to his room with a bag of presents and a Christmas tree. John knew him from the television. He was a famous sports star who was visiting all the ill children. And the man was not the only person who came that day. All the students from his class came to visit him. And two of his teachers brought him the best present – some Maths homework!

B Write some words to complete the sentences about the story.

WATER AND RIVERS

Water is very important on our planet and all need it to live. People and animals drink it. Farmers use it to grow food people to eat. Fish and sea animals live in it. The water on our planet isn't the same The water in the sea has salt in it. You can taste this if you go swimming in it. But the water in rivers hasn't got any salt in it. And water is always the same temperature. In some places, it's so cold that we ice on the top of water. But the weather is warmer, this never happens. But where water come from? Water can come from rivers or through rocks are under the ground. It can also come from the sky in rain or snow. Rivers are very important to We use rivers to take things from one place to another boat. Villages, towns and cities are often next to rivers because people can use the water to drink and grow their food.
